# CIS4900 - Plaintiff Classification for Medical Debt Analysis

**Instructor:** Luiza Antonie
**Office :** Reynolds Building, Room 3325
**Email:** lantonie@uoguelph.ca

## 1 Course Description

The Civil Justice Data Commons, developed and hosted by the Massive Data Institute and Georgetown University Law Center, has a large collection of civil court data. This course will use civil court data from that repository with the goal of classifying plaintiffs as medical or non-medical related. This classification problem, on real data, will have impact on supporting understanding and analysis of medical debt in US.

This course will have several components:

- Developing software to clean and standardize civil court data
- Extract plaintiff information from the civil court data
- Research and develop software to classify plaintiffs as medical or non-medical

## 2 Course Work and Evaluation

The final grade of the course will be determined based on the following components.

| | |
|---|---|
| Presentations (2) | 40% |
| Project Report | 60% |
